## **GENERAL OBJECTIVES**

Students of nursing will develop skill in applying nursing process in the care of patients in variety of clinical setting and they develop skill in performing various procedures, strictly following the related scientific principles and rationale for the steps followed.

## **CONTRIBUTORY OBJECTIVES**

1. Follow systematically the steps of the procedures
2. Correlate the knowledge from other disciplines while performing the steps of the procedures
3. Assemble all articles, required for the procedures
4. Demonstrate skills in performing the procedures accurately
5. Develop skills in assessment planning, implementing and evaluating the Nursing care in different setups, i.e. Hospital and Community
6. Assess the learning needs of clients, plan and implement health education
7. Develop an ability to record and report

## INSTRUCTION FOR USE OF PROCEDURE RECORD

1. The maintenance of practical record ensure that student has received instruction on Nursing Procedure and also aids in recording whether student has performed the procedure to the satisfaction or not.
2. The practical events must be entered carefully and the record sheet should be marked after every discussion.
3. It is desirable that all procedures should be demonstrated in the classroom before they are carried out in the ward.
4. Procedures should be signed by the clinical instructor, when student has performed the procedure satisfactorily.
5. No student should be allowed to perform procedure without demonstrating it in the classroom.
6. Procedures are to be signed after sufficient practice in the clinical area.
7. The student must take responsibility for obtaining a signature from the respective clinical instructor.
8. Evaluation of student performance should be carried out periodically.
9. A student must complete all the procedures and update practical record at the end of each academic year.
